

March 10 - June 22, 2007 • Buffalo Museum of Science

What might global warming mean to Western New York and the Earth's biodiversity? *GLOBEO* will include a special focus on the impact upon the Great Lakes region, through exhibit elements, enhanced programming and resource materials presented by a myriad of local environmental organizations that are partnering with the museum.

The Climate Change Show

by Ontario's Science North

This one-of-a-kind multimedia presentation, approximately 20 minutes in length, is presented in its own object-rich interactive theatre filled with magnificent environmental effects that recreate weather and climate changes. The story is told by a fast-talking, but informed animated sheep that talk about the past, present and future of the world's climate and how it affects life on earth. In addition, interactive exhibits are presented to support the content of the show. *An additional*

charge of \$2 will apply to this special presentation which will be shown on an hourly schedule. The additional charge is waived for museum members.

SUNDAY, MARCH 25 - 2 p.m.
